

What is the most common way people find out about Udacity?

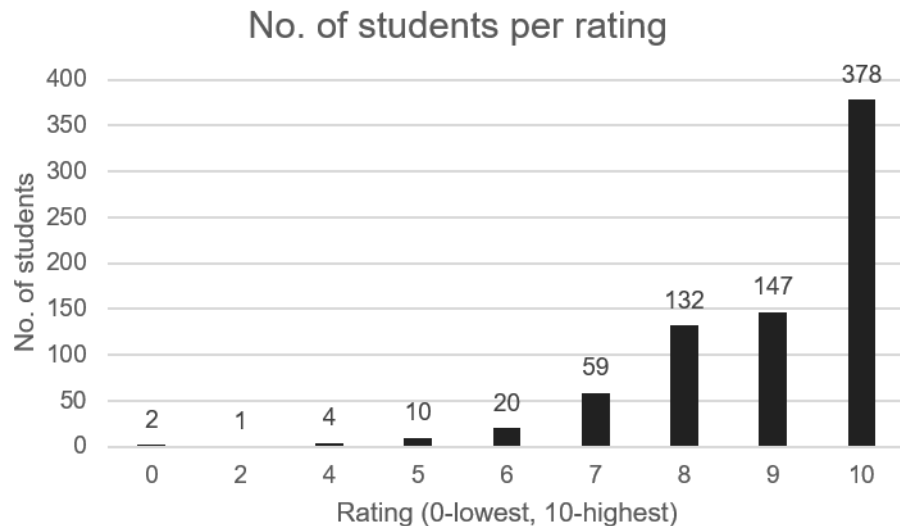

How did you find out about Udacity?

| Source | No. of Students |
|------------------------|-----------------|
| Billboard | 2 |
| Facebook | 26 |
| Friend / word of mouth | 147 |
| Google | 446 |
| LinkedIn | 11 |
| Twitter | 16 |

Based on the graph shown on the left, 446 students found out about Udacity through Google, which is also the top source. Followed by through friends or word of mouth with 147 students. The rest of the sources such as Twitter, LinkedIn, Facebook and Billboard are less than 100 students. This is just survey respondents and is not from the entire Udacity Student population thus it does not tell us how all students find out about Udacity.

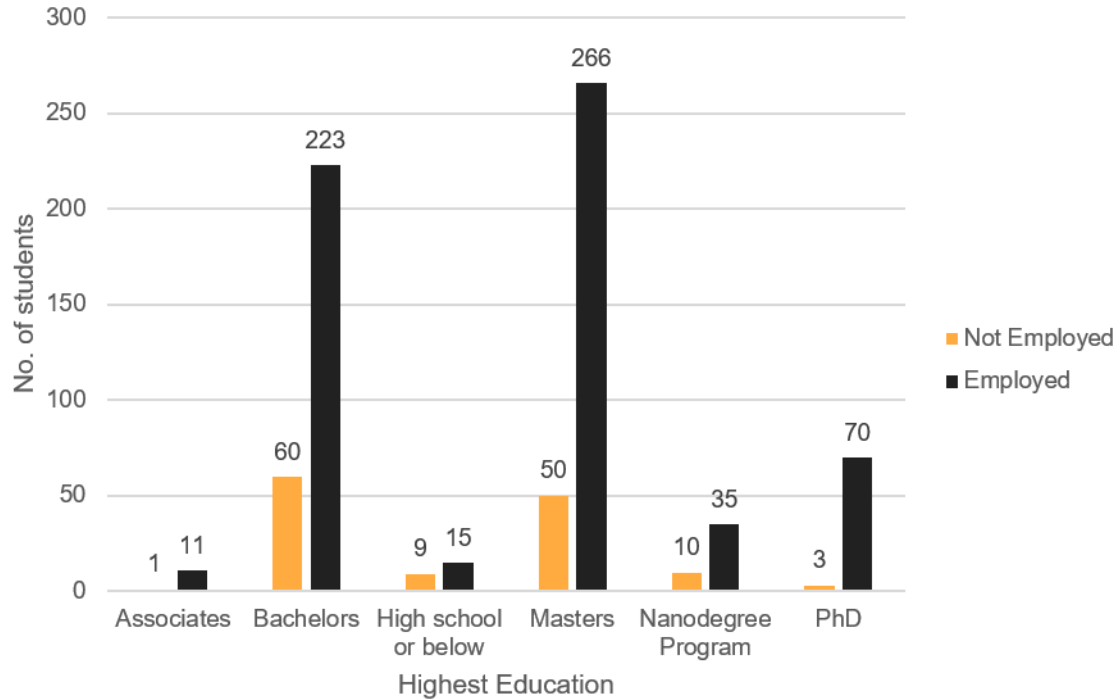

Do Udacity graduates like the Nanodegree program?

| | |
|--------------------|------|
| Min | 0 |
| Max | 10 |
| Mean | 8.98 |
| Median | 10 |
| Mode | 10 |
| Standard Deviation | 1.36 |

The chart shows a skewed-left distribution, which means the mean is less than median, this also shows that most graduates like the Nanodegree program. The min is 0 and max is 10 which tells us how widely spread out the extreme observation of the distribution are. The mean of the distribution is 8.98 and 10 for both the median and mode, which means most students, will give a rate a minimum rating of 8. A standard deviation of 1.36 tells us that most of the numbers are very close to the average. However, this is just survey respondents and is not from the entire Udacity Student population thus it does not tell us what everyone thinks.
